NEWS RELEASE

**FOR IMMEDIATE RELEASE**

### **Hexion Announces First Mobile Permian Basin Resin Coating Plant**

**HOUSTON, Texas** - (February 7, 2018) - The Oilfield Technology Group (OTG) of Hexion Inc. (Hexion) today announced its new Voyager<sup>SM</sup> mobile resin coating service. Initially located in the Permian Basin, the innovative Voyager service is the first mobile manufacturing solution that provides in-basin resin coated proppant manufacturing for application in the oil and gas industry.

Hexion is the first company to develop mobile resin coating technology, offering customers efficient manufacturing of resin coated proppants on any substrate. Manufacturing can occur in any location that offers optimum logistics to the wellsite, even internationally.

Hexion's mobile plant occupies a small footprint and offers a variety of advantages over a traditional manufacturing facility. Most notable is that the facility is mobile, which enables strategic and efficient placement near transloads and sand mines. With transportation being a major cost associated with the use of proppants, freight costs are significantly reduced by the ability to locate coating capacity in close proximity to areas of high drilling and completions activity.

"This new model allows for better alignment with our customers by unlocking supply chain synergies, resulting in unmatched coating operational efficiency and quicker delivery of resin coated proppants," said Jerry Kurinsky, Senior Vice President and General Manager, OTG. "Ultimately, this translates to cost savings for our customers."

In addition to being mobile, the Voyager mobile resin coating service is operated with fewer personnel, which further reduces costs. It is also supported by a mobile quality control center to ensure the highest quality standards through systematic monitoring and product testing.

**About Hexion's Oilfield Technology Group**

Hexion's Oilfield Technology Group is a leading provider of innovative technologies for the oil and gas industry. We offer well stimulation solutions with our advanced resin coated proppants and a variety of performance additives for oilfield applications. Our products also include production chemicals such as hydrogen sulfide scavengers for crude oil and natural gas production. Hexion is committed to enhancing its industry leadership and meeting its customers' specific application needs with a total solutions approach of quality products and services. Additional information is available at [www.hexion.com/oilfield](http://www.hexion.com/oilfield).

## **About the Company**

Based in Columbus, Ohio, Hexion Inc. is a global leader in thermoset resins. Hexion Inc. serves the global wood and industrial markets through a broad range of thermoset technologies, specialty products and technical support for customers in a diverse range of applications and industries. Hexion Inc. is controlled by investment funds affiliated with Apollo Global Management, LLC. Additional information about Hexion Inc. and its products is available at [www.hexion.com](http://www.hexion.com).
